**Dr.D
Release 6.8
Technical Release Notice**

This document describes requirements for and enhancements to release 6.8 of BIM-Dr.D.

System Requirements

Dr.D 6.8 supports all VSE/SP, VSE/ESA, z/VSE and MVT/VSE releases and both CICS/VS and CICS/TS.

Additional Changes

Effective with Dr.D 6.8, the expiration code is supplied by the standard CSI PRODKEY facility. Please contact your CSI marketing representative for the appropriate PRODKEY.

Dr.D 6.8 has a new add-in product, Dr.Crypto. Dr.Crypto will create encrypted backup files.

Space Requirements

Library Space

2,200 library blocks

Execution Size

Due to size change in several modules, specifically for restores, it is recommended the SIZE parameter on the EXEC statement be changed to SIZE=400K.

Pre-6.8 Compatibility Information

There are no known restrictions with BIM-Dr.D 6.8 when using save files created prior to Dr.D 6.8.

If You Need Help

Use the LIBR program to print out the member TECHNOTE.Z from library where Dr.D has been installed. This will have all the latest information relating to this release. If you have problems or questions concerning BIM-Dr.D, please contact Technical Support at (800) 795-4914.
